

K10 Series
GUIDE BOOK

K10 Series

The completion of the ergonomic design, K10

K10 is ergonomically designed to satisfy various postures and body conditions of various users regardless of region, climate, race and culture. Also, the various functions contained in various parts of K10 minimize the fatigue of neck, waist and knees that the users could feel during long time sitting.

M6x55 (4)

step 01

Base and Gas Cylinder Assembly

Put gas cylinder onto the base.

Assemble casters onto the base.

step 02

Backrest and Seat Assembly

Tighten bolt (D→E→F) using a wrench (G).

step 03

Armrest Assembly

Tighten bolts (H) using a wrench (G).

step 04

Base and Body Assembly

Complete the assembly of the seat and armrests and then connect with gas cylinder by putting it into the hole of tilt mechanism underneath the seat.

Assembly following as above image is recommended.

When the base is assembled, cautiously stand the chair upright.

step 05

Headrest Assembly **

Assemble the headrest and backrest using bolts. Tighten bolts(B) using a wrench(A).

** This only applies to the headrest type models.

Insert headrest cap while hole on the cap heading downward.

Synchronized Tilt Mechanism

Height Adjustment

Push up the flat lever on your right side to adjust the height. If you adjust the lever while standing, the seat goes up and the seat goes down while sitting.

Angle Adjustment

Lock to the preferred backrest angle by simply rotating the lever on your left side counterclockwise. To unlock the angle, rotate the lever clockwise and slightly push the backrest backward. (Anti-shock function)

Tilting Tension Adjustment

Adjust the tilting tension by simply rotating the lever on your right side. To make strong tension, please rotate the lever clockwise. To make soft tension, please rotate the lever counterclockwise.

Headrest

Height Adjustment

Adjust the height by sliding the headrest up and down. Elastic tilting will add more comfort to this adjustable feature.

Seat

Depth Adjustment

Adjust the seat depth by pulling the lever underneath your right-side seat. While pulling the lever, you can slide the seat forward to make it deep. To return to the original position, slightly stand up and pull the lever again.

Lumbar Support

Height Adjustment

Adjust the height by putting the lever up and down.

Depth Adjustment

Adjust the depth by rotating the lever.

Armrest _ 4D

Height Adjustment

Adjust the height while pushing the buttons underneath the arm pad.

Width / Sideways / Forward&Backward

Adjust the position of armrests in additional 3 ways without pushing buttons.

Warning

01. Do not use the chair for the purpose other than it originally meant to be.
02. Please be advised that the warranted weight capacity of the chair is 113kgs or less.
03. If you put excessive impact on the chair while tilted, it may be damaged.
04. Leaning on unfolded chair from behind could fold the chair and lead to injuries.
05. Do not press the backrest while someone is seated on the chair.
06. Do not push the chair when someone is seated.
07. Please do not use each chair more than two person.
08. Take care to avoid inserting your feet into the spaces of the seat.
09. Excessive weight may result in overturn and cause damage.
10. Do not put or insert your finger in to any part of the chair.
11. Do not put your finger into the gap of the chair.
12. Avoid using the product while front of the seat is lifted.
13. When seating, please do not tilt your body left/right excessively.
14. Do not use the chair for exercise such as push-ups.
15. Do not throw the chair.
16. Do not kick the chair.
17. Do not walk across the chairs.
18. Please get full knowledge for usage of the chair beforehand for more proper use.
19. We do not apply any warranty for any possible injuries, dangers and damages caused by neglect of the above warnings.
